

VIDEO SIGNING ROOM – VSR™

Video-recorded remote signing for full compliance – using our patented technology

Host and schedule signing sessions with built-in video conferencing for nonrepudiation purposes

Web-enabled video conferencing from any modern browser — no downloads required

Host shares the documents with participants in the Video Signing Room and has complete control of each document

Chat window enables live text communication with participants

Host sends links to signers' phones in order for them to remotely send their one-time use signatures

Instantly receive multiple remotely signed documents

Signers can join and view the document on their PC or tablet screen and send signatures from their smartphone

Video recording of screen share and video conversation included in MasterFile Audit trail

Get the **convenience** of eSignatures and the **security** of ink on paper in one overarching solution.
